Professional Surface Finishes for Marble & Granite

Flamed

Created by exposing the stone to intense heat, producing a rough, textured, and slip-resistant surface ideal for outdoor paving.

Sand Plast

Formed using high-pressure sand spraying to create a fine-grained, matte texture with balanced slip resistance.

Bushhammer

Mechanically pounded to achieve a heavy, pitted texture that offers excellent slip resistance for exterior applications.

Tumbled

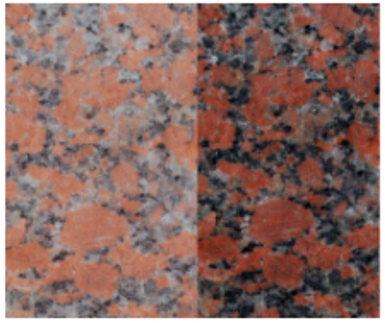
Processed to create a weathered, aged look with softly rounded edges and a textured, antique feel.

Acid Wash

Treated with specialized acidic solutions to etch the surface, resulting in a distressed matte look with subtle vintage appeal.

Calibration

Precisely machined to ensure uniform thickness and exact dimensions across all tiles for seamless installation.



Honed

A smooth, matte finish with little to no gloss, offering a velvet-like touch that easily masks daily wear.

Brushed / Antique

Brressed with specialized tools to wear away softer parts, giving the stone a textured, weathered surface with natural depth.
